

Five Keys to specifying **Grease Duct**

1. UL 1978 and UL 2221 listed and labeled product

- *Ensures highest level of fire safety*
- *Testing ensures all aspects adherence of standards*
- *Zero clearance and two-hour fire rating eliminates the need for fire rated shaft*
- *Lower slope requirement than field fabricated product*

2. Lifetime product warranty

3. Quick and secure joint connection

- *Reduces contractor installation time and overall cost*
- *Secure connection that will not leak*

4. Offerings include a round and obround design

- *SlimVent™ obround grease duct allows a UL listed product to fit in tight spaces*
- *FyreGuard™ UL listed round grease duct allows flexibility*

5. Complete system design

- *Complete system design meeting NFPA and IMC requirements*
